

FAIRY DAY CELEBRATION YEAR 2019

I've create this chart to celebrate the Fairies! Every year, on the 24th of June, is Fairy Day! Throughout man's history, Midsummers Day has been known as a time to revel in the magic of nature. It is one of the few "in-between" times, when the veil is drawn thinnest and crossing between the worlds is at it's easiest. This day, the longest of the year is known for odd things happening to unwitting mortals, victims of the fairies playful games. It is at this time that fairies may be seen, dancing round rings, or that mortals with the desire and a pure heart may meet a fae out walking in the woods.
